

# Calculator of Privilege

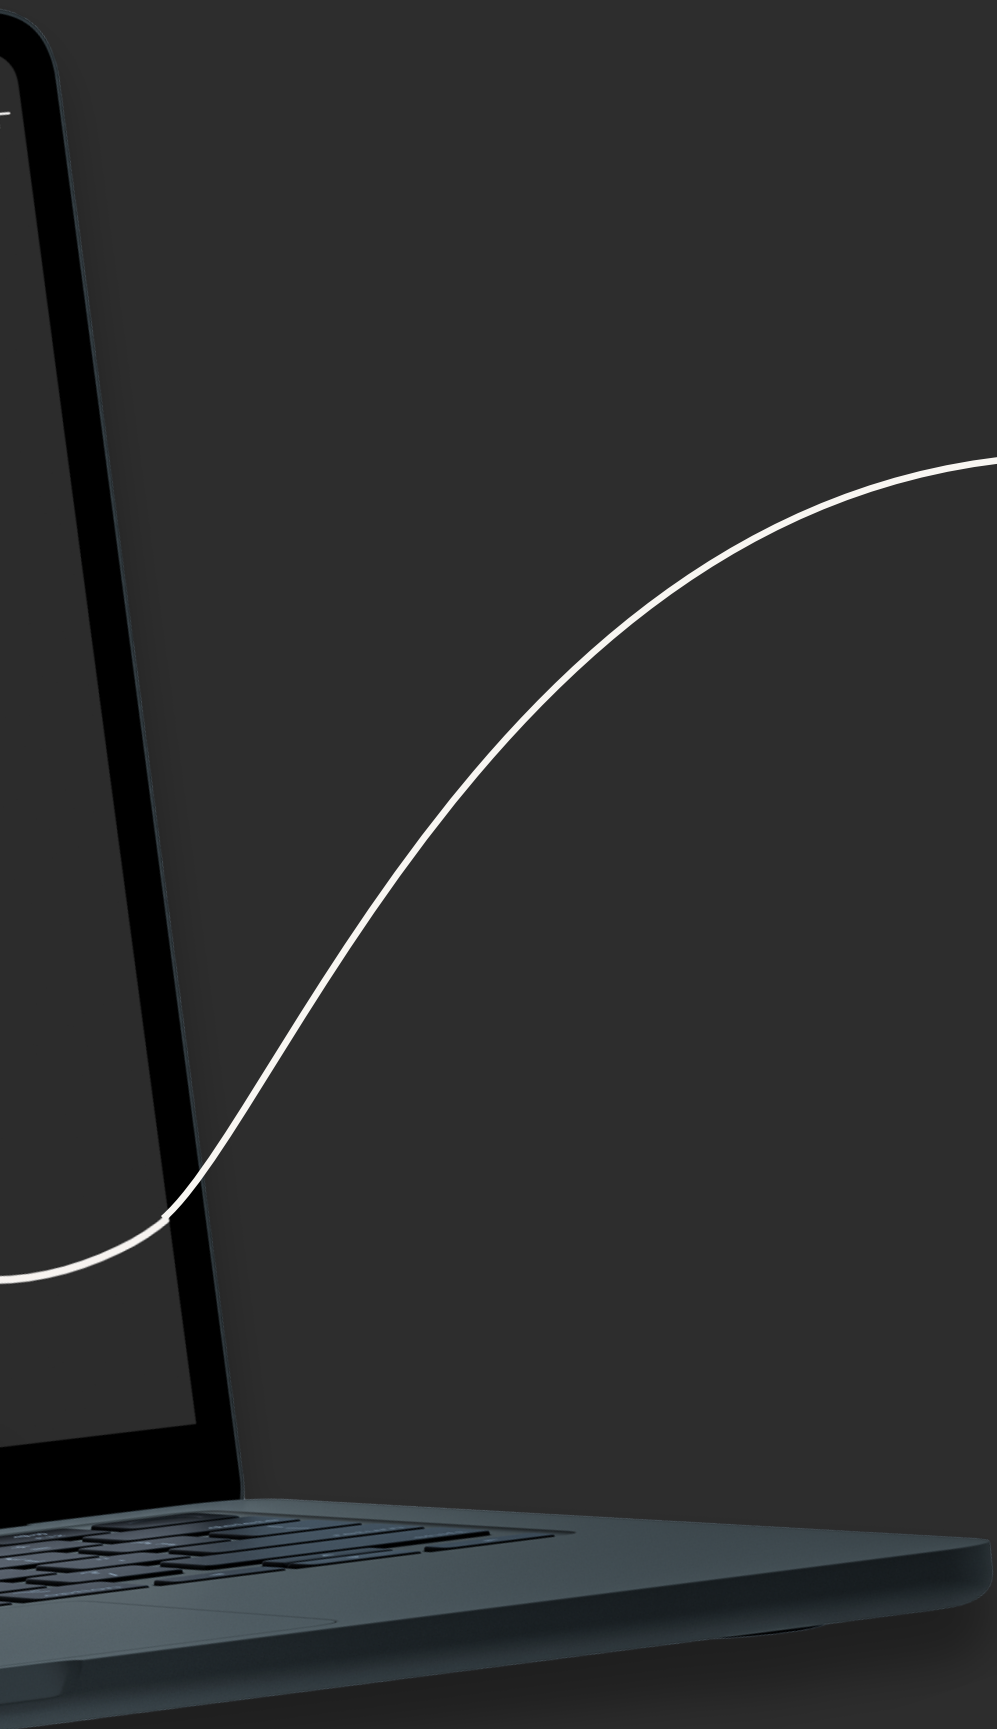

## Bespoke editions

Why a bespoke edition of our online tool could help your organisation

# Relevant

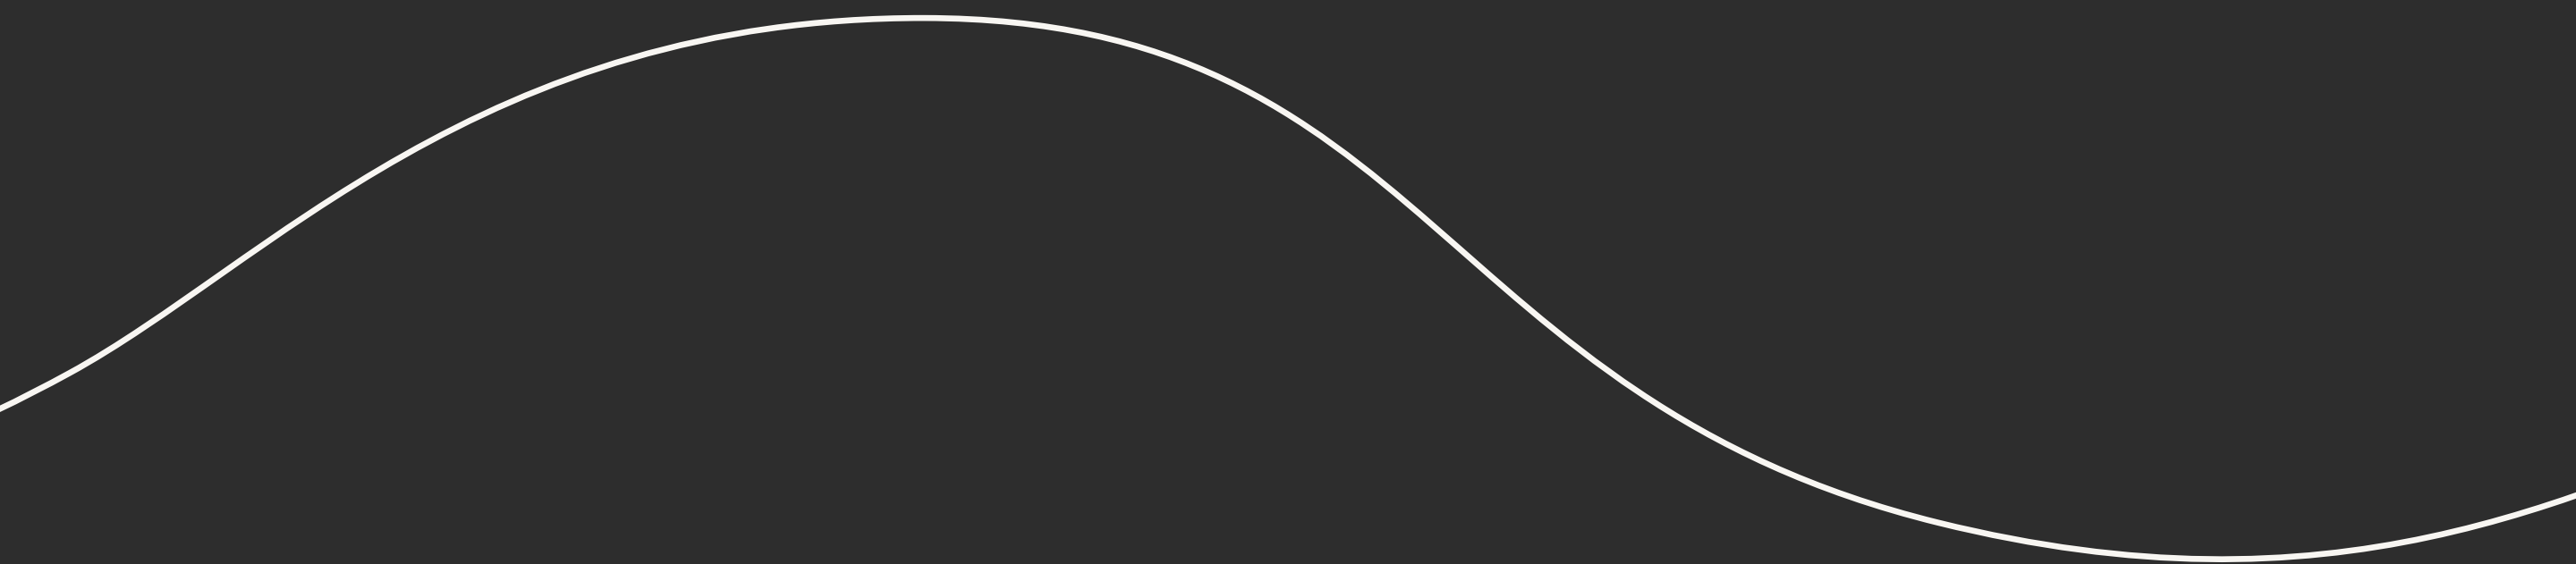

We customise each question and category to make sense for your sector and organisation's needs. So every single part of the tool is relevant to you.

# Engage

By asking your team to reflect on their own journey, they are able to really pause and consider each element that may have been impacted by privilege, both negatively or positively.

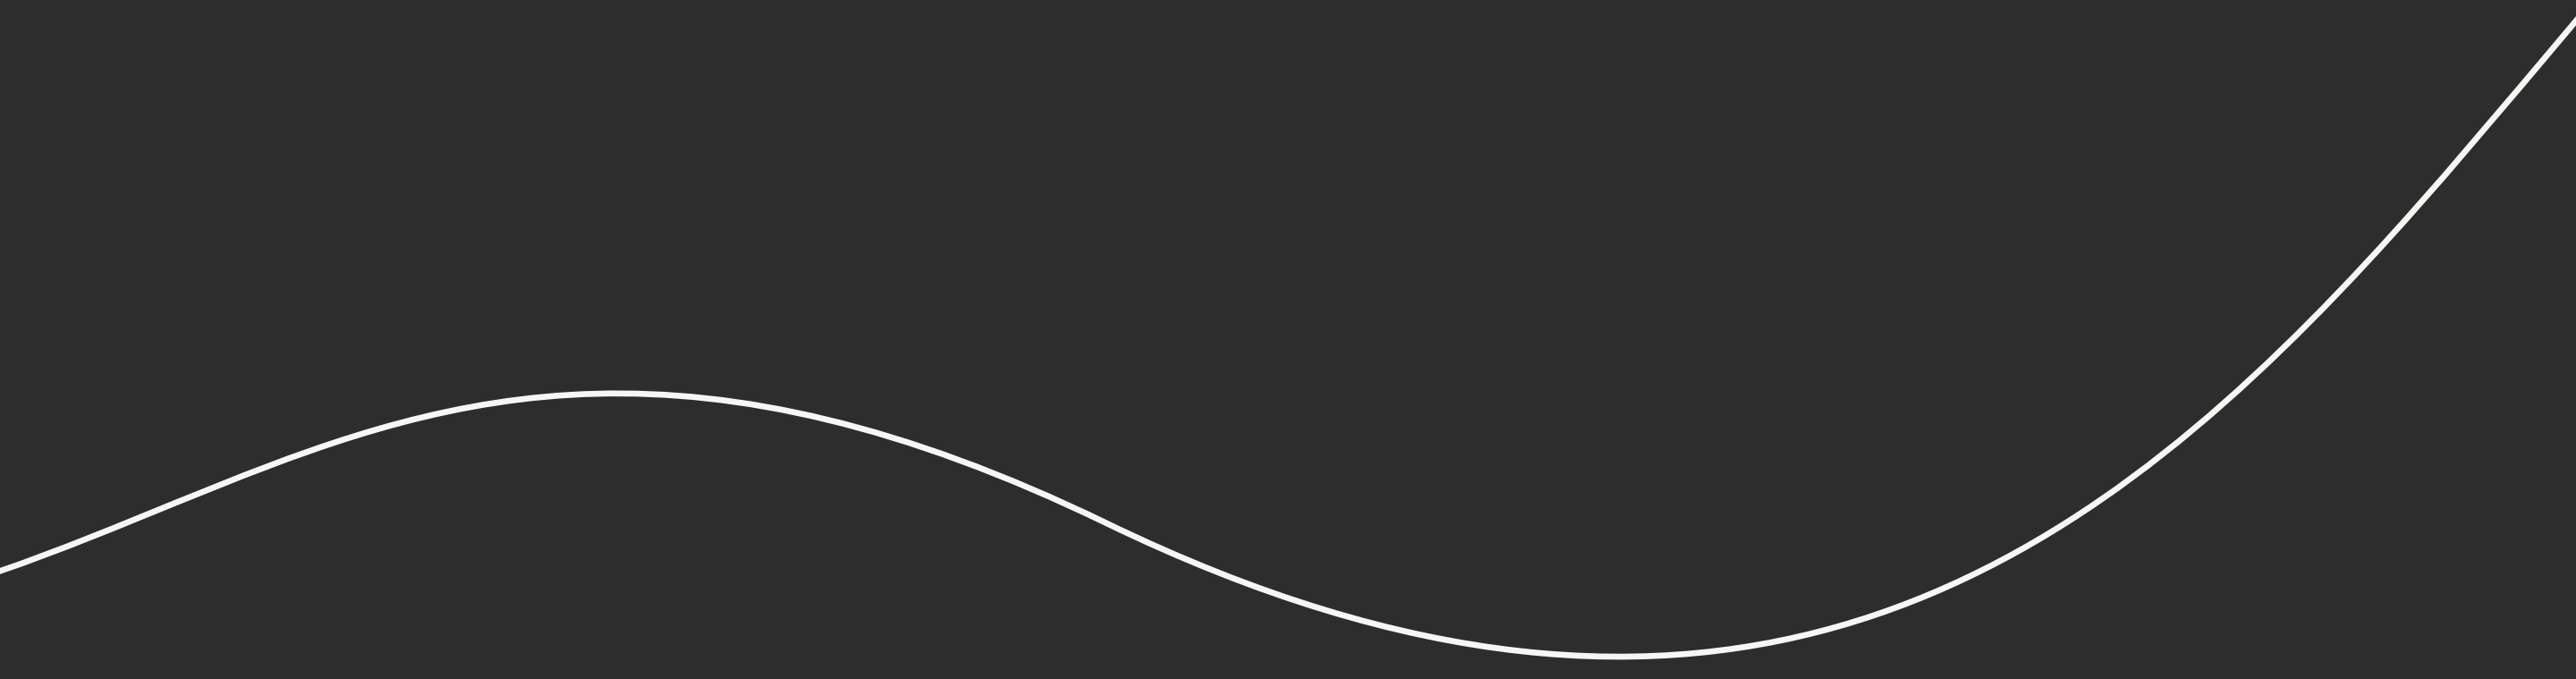

This builds engagement and care among your team, which are essential foundations for making lasting change in any organisation.

# Communication

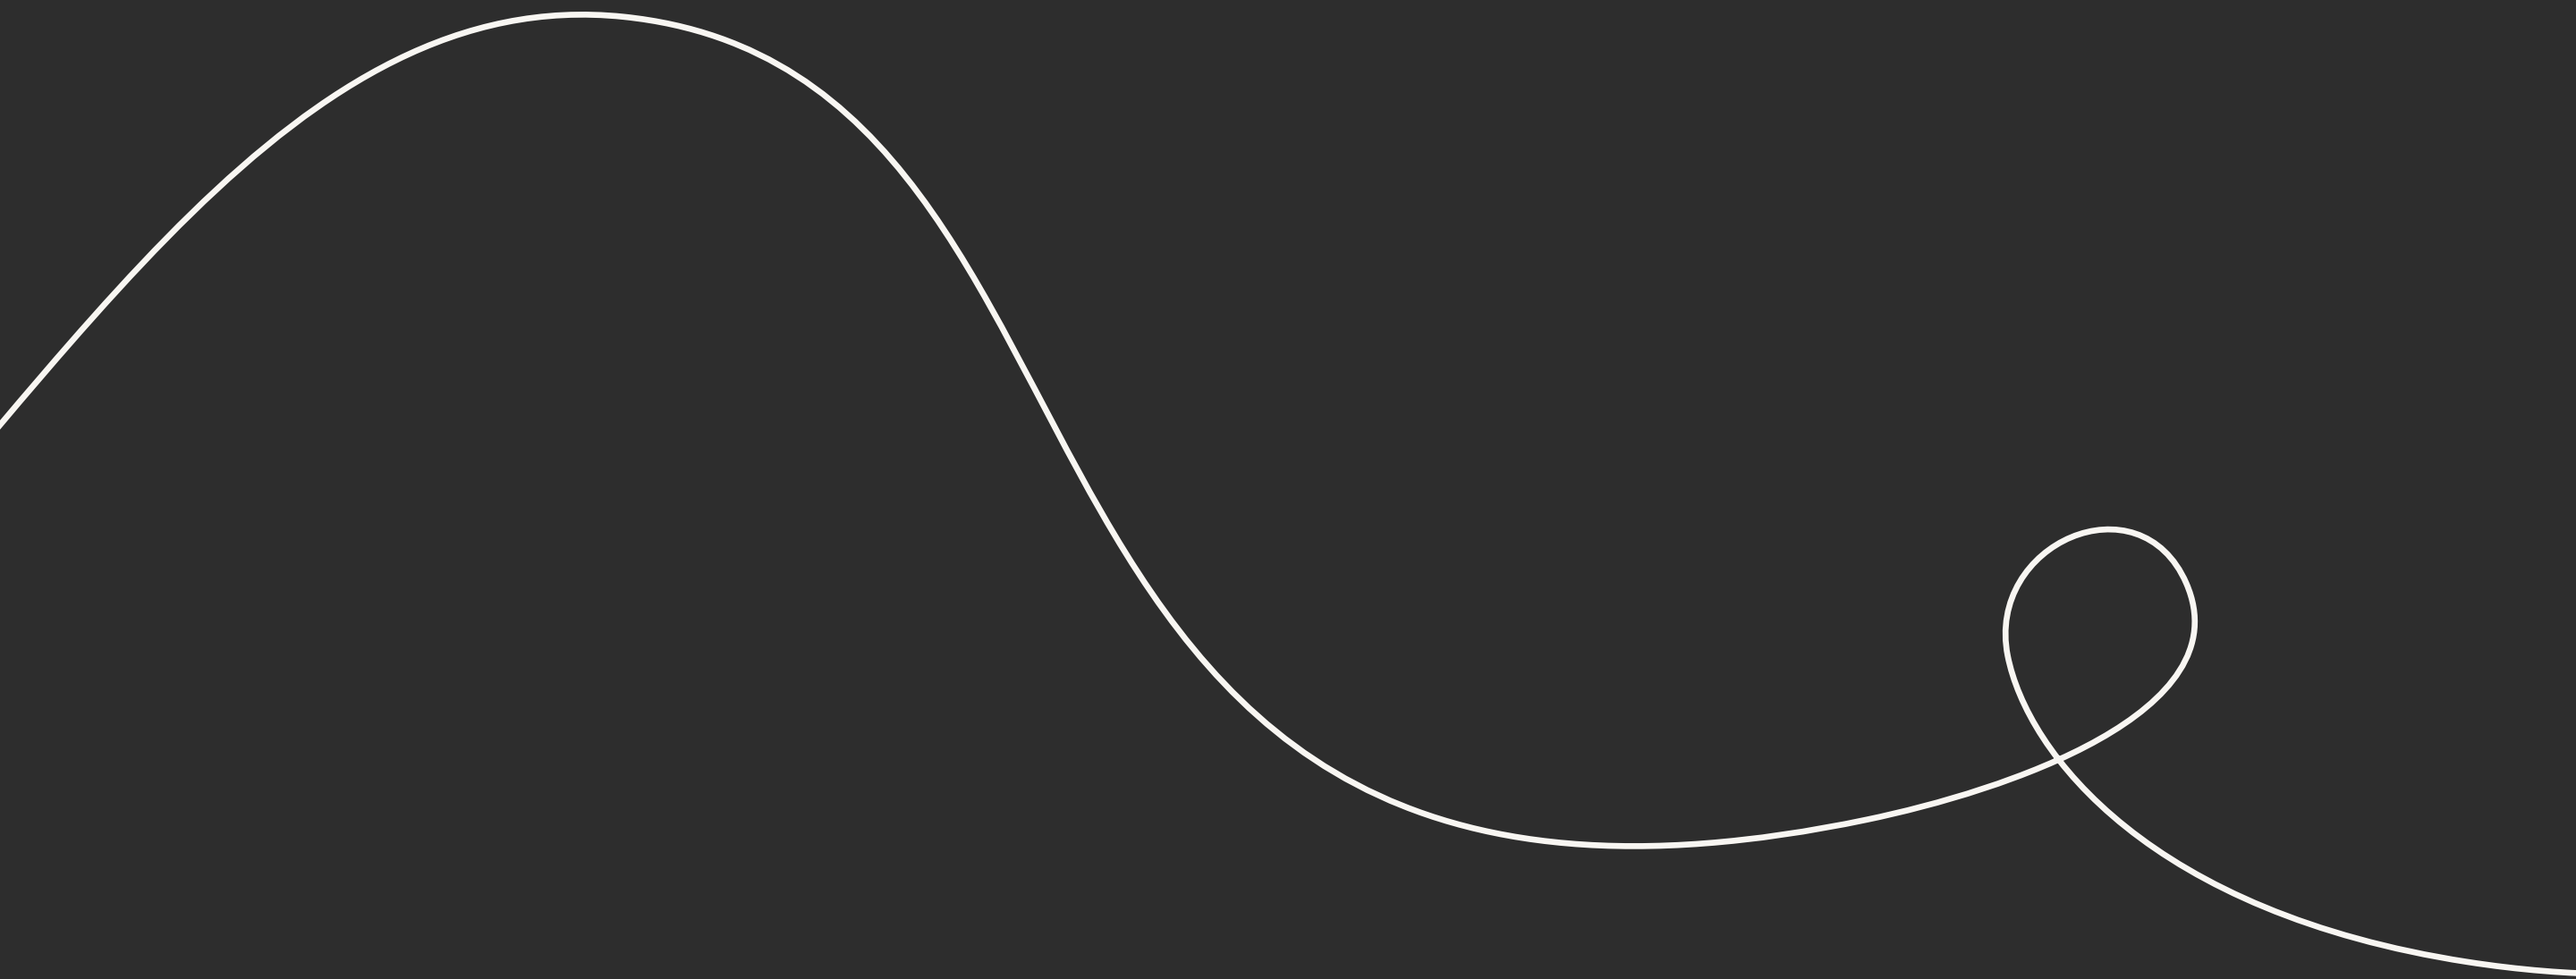

The results from the Calculator of Privilege spark important conversations around our individual privilege.

This tool prompts participants to open up about their results and thoughts, which we then help to turn in to actionable improvements to your EDI goals.

# Data

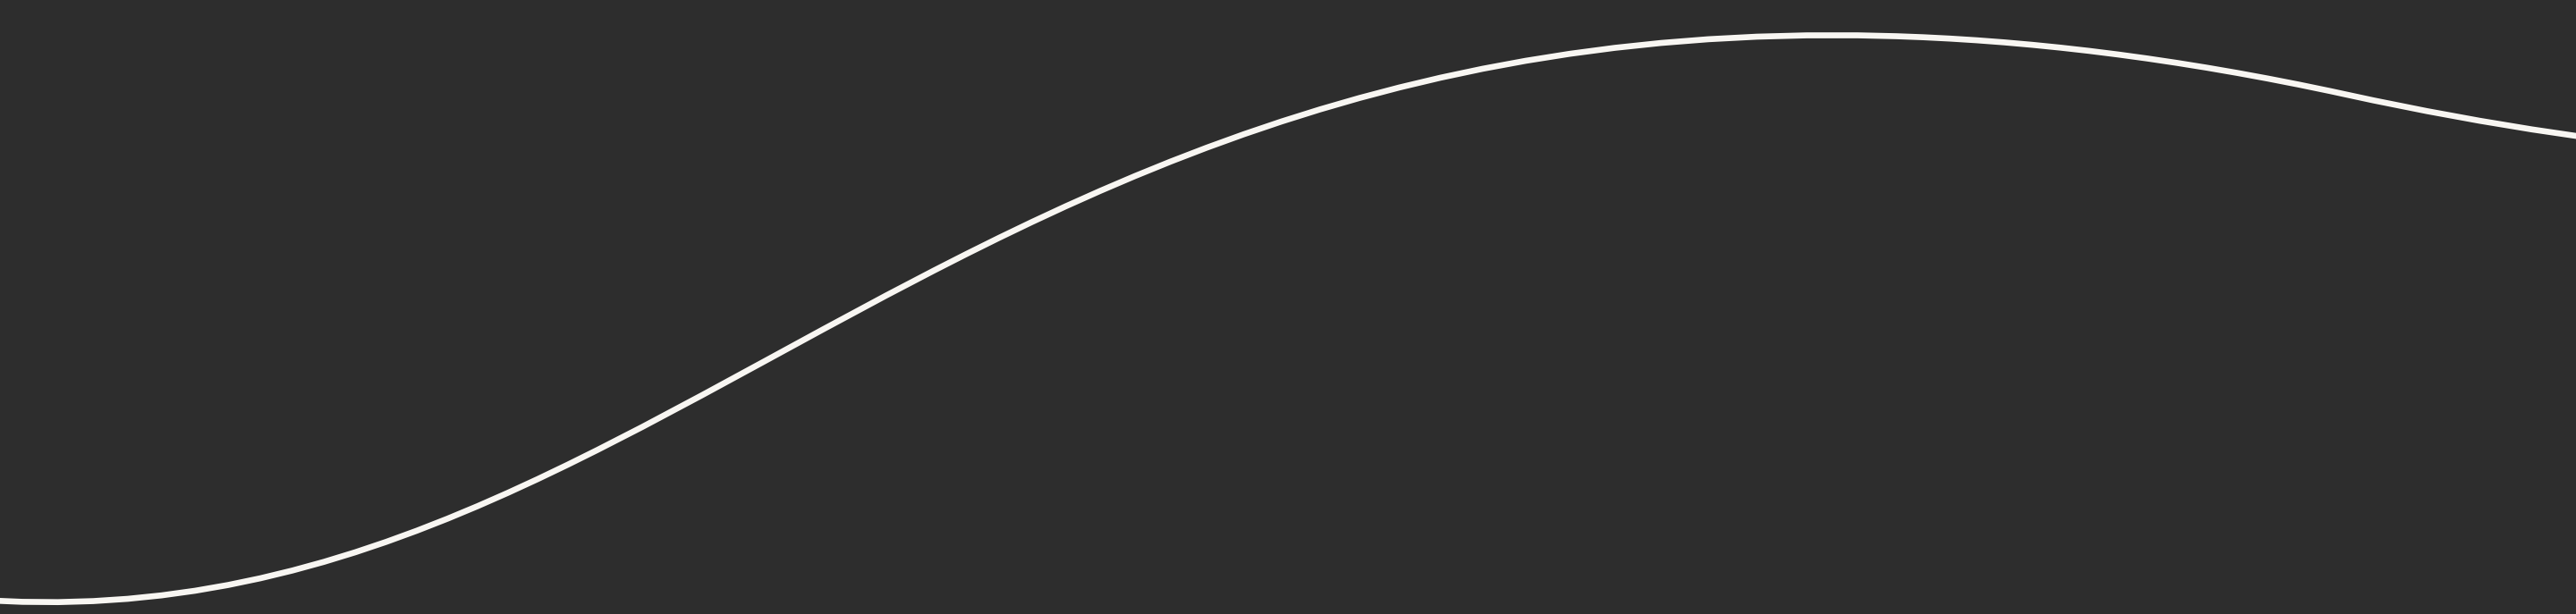

The tool allows you to capture data on your entire workforce to better understand your organisation's EDI landscape, and aid in tracking your progress in years to come.

# Ongoing support

Our support doesn't just end once we've created your bespoke edition; we're here to help you plan improvements and take action.

We have many service offerings that can help you maintain momentum or help you when you hit a road-block. We're your partner through this journey.

Contact **Diversity+** to discuss  
creating your bespoke edition of  
the Calculator of Privilege today
